## Deficiency

a two-hour-resistant firewall in common walls.

an automatic smoke detection system in all hallways.

properly protected cooking facilities.

Have drugs and other similar products available, which are needed every day and in emergencies, and give them out properly.

Provide activities to meet the needs of each resident.

Use properly trained paid feeding assistants, provide licensed nursing supervision of the feeding assistants, or properly monitor the feeding residents.

a two-hour-resistant firewall in common walls.

an automatic smoke detection system in all hallways.

properly protected cooking facilities.

walls or barriers that prevent smoke from passing through and would resist fire for at least one hour.

Have a program to keep infection from spreading.

Make sure all assessments are accurate, coordinated by an RN, done by the right professional, and are signed by the person completing them. Ensure an approved installation, maintenance and testing program for fire alarm systems.

Ensure fire safety features required by current fire safety codes.

Make sure that residents are safe from serious medication errors.

Give professional services that meet a professional standard of quality.

Make sure that the nursing home area is free of dangers that cause accidents.

Give each resident care and services to get or keep the highest quality of life possible.

Prepare food that is nutritional, appetizing, tasty, attractive, well-cooked, and at the right temperature.

Make sure that the nursing home area is safe, easy to use, clean and comfortable.
